Dear <Recipient>,

I am writing in response to your letter regarding the implementation of the Pan-Canadian Public Health Strategy. I believe that a comprehensive approach to public health is essential for the well-being of all Canadians. The Canadian Medical Association (CMA) has long advocated for a strong, integrated public health system that can effectively address the diverse health needs of our population.

In recent years, the CMA has emphasized the importance of population health and health equity. The public health system plays a critical role in preventing and controlling diseases, promoting healthy behaviors, and ensuring that all Canadians have access to quality health care. The CMA supports the development of a Pan-Canadian Public Health Strategy that is inclusive, collaborative, and evidence-based.

The CMA encourages the implementation of policies that promote health equity and address social determinants of health. We believe that a strong public health system is a vital component of achieving these goals. The CMA stands ready to work with all levels of government and stakeholders to ensure that the Pan-Canadian Public Health Strategy is effective and sustainable.

Sincerely,

[Your Name]

Answering the Wake-up Call: CMA’s Public Health Action Plan

CMA submission to the National Advisory Committee on SARS and Public Health

June 25, 2003

EXECUTIVE SUMMARY

The public health response to SARS is a demonstration of our community values. It is the government’s duty to protect public health, and the government’s failure to do so was a scandal for the Canadian health care system. CMA’s contributions to the public health response were

• The Canadian Medical Association (CMA) has been working to improve public health care and the health of Canadians. CMA has provided extensive consultation and advice to the government. CMA has also provided significant resources to the public health response.

• CMA has been working to improve public health care and the health of Canadians. CMA has provided extensive consultation and advice to the government. CMA has also provided significant resources to the public health response.

• CMA has been working to improve public health care and the health of Canadians. CMA has provided extensive consultation and advice to the government. CMA has also provided significant resources to the public health response.

NOTES FOR AN ADDRESS

Dr. Ian Levy, Chief Medical Officer and Director
Office of Public Health
Canadian Medical Association

Presentation to the House of Commons Standing Committee on Environment and Sustainable Development

Brian Levy
June 12, 2006

A healthy population is an integral medical profession
Public health is medicine; one profession within the discipline
February 28, 2007

Mr. Susan Hunt, MP
Chair, Legislative Committee on Bill C-30

Dear Mr. Hunt,

The Canadian Medical Association (CMA) is pleased to participate in the review of Bill C-30: The Clean Air Act. The CMA, on behalf of its 60,000 currently practicing members, respectfully submits the following.

The Canadian Medical Association (CMA) acknowledges the importance of Bill C-30: The Clean Air Act. The CMA, on behalf of its 60,000 currently practicing members, respectfully submits the following.

The Environment and a Healthy Population

The physical environment is the determinant of a population’s health and the medical profession is committed to maintaining the highest standards of practice and care. The health of Canadians is a reflection of the quality of the environment in which they live. Air quality and the relationship of air pollutants to human health have been recognized as important factors in the health of the population. These factors are of particular concern to those who experience the adverse effects of pollution on a daily basis.

Canada has a unique and exceptional opportunity to address the issue of air pollution. For many years, the Government of Canada has been taking steps to address this critical issue. These efforts have been commendable, and the CMA applauds the Government’s commitment to improving the environment and the health of Canadians.

The economic benefits of cleaner air are tremendous. A study conducted by the Canadian Medical Association estimated that 12,900 premature deaths occur annually in Canada due to air pollution. These deaths are preventable, and the health care system could save billions of dollars by reducing pollution. By reducing pollution, the economy will benefit. The health care system will benefit, and the environment will benefit.

The CMA is committed to promoting the health of Canadians and supporting policies that will lead to a healthier environment. We look forward to working with the Government of Canada to ensure that the Clean Air Act is passed in a timely manner and that it is effective in improving the health of Canadians.

Sincerely,

[Signature]

This CMA policy is concerned with active transportation, which includes walking, cycling, and other forms of physical activity that contribute to overall health and well-being. The policy emphasizes the importance of creating environments that support active transportation, such as well-connected, pedestrian and bicycle-friendly areas. It also highlights the benefits of active transportation, including improved health outcomes and reduced environmental impact. The policy recommends strategies to encourage active transportation, such as improving safety and accessibility for all users.
