**PRINCIPLES TO GUIDE HEALTH CARE TRANSFORMATION IN CANADA**

**PREAMBLE**

The Canadian Medical Association (CMA) is the national, voluntary, and professional organization representing the physicians of Canada. The CMA is concerned with the current and future health care system in Canada. It is committed to ensuring that all Canadians have access to high-quality, sustainable, affordable health care services. The principles outlined in this policy document are intended to guide the development and implementation of sustainable, equitable, and efficient health care systems in Canada.

**PRINCIPLES**

1. **Healthcare access**: All Canadians should have access to high-quality health care services, regardless of their socioeconomic status, geographic location, or insurance coverage.
2. **Equity**: Health care services should be available and accessible to all Canadians, ensuring that no one is denied care due to financial barriers.
3. **Sustainability**: The health care system should be sustainable, with the resources available to meet the current and future health needs of Canadians.
4. **Quality**: Health care services should be delivered to Canadians in a manner that is safe, effective, and efficient.
5. **Patient-centred care**: The health care system should be patient-centred, with the needs and preferences of patients being the primary focus.
6. **Collaboration**: The health care system should be collaborative, involving all stakeholders in the planning, delivery, and evaluation of health care services.

The CMA will work with governments, policymakers, and other stakeholders to implement these principles in order to transform the health care system in Canada, ensuring that all Canadians have access to high-quality, sustainable, and equitable health care services.
