PRINCIPLES TO GUIDE HEALTH CARE TRANSFORMATION IN CANADA

PREMISES
The population health, economic and social benefits of transforming the health care system depend on achieving evidence-based, patient-centred, integrated care that is sustainable, accessible and affordable. This requires making smart investments in the health care system to ensure that Canadians maintain and improve health, and that physicians and other health care professionals use their expertise to provide the care. Canadians should assume a central role in determining the health care they want and need.

PRINCIPLES
1. Principles are the core principles underlying the principles for health care transformation. They guide the development of the framework, and provide a defensible basis for policy development.
2. Principles are the core principles underlying the standards for health care transformation. They guide the development of the standards, and provide a defensible basis for policy development.
3. Principles are the core principles underlying the indicators for health care transformation. They guide the development of the indicators, and provide a defensible basis for policy development.
4. Principles are the core principles underlying the outcomes for health care transformation. They guide the development of the outcomes, and provide a defensible basis for policy development.
5. Principles are the core principles underlying the processes for health care transformation. They guide the development of the processes, and provide a defensible basis for policy development.
6. Principles are the core principles underlying the strategies for health care transformation. They guide the development of the strategies, and provide a defensible basis for policy development.
7. Principles are the core principles underlying the resources for health care transformation. They guide the development of the resources, and provide a defensible basis for policy development.
8. Principles are the core principles underlying the systems for health care transformation. They guide the development of the systems, and provide a defensible basis for policy development.
9. Principles are the core principles underlying the policies for health care transformation. They guide the development of the policies, and provide a defensible basis for policy development.
10. Principles are the core principles underlying the programs for health care transformation. They guide the development of the programs, and provide a defensible basis for policy development.
