Principles for Health System Governance

The Canadian Medical Association (CMA) promotes a proactive, collaborative, and evidence-based approach to health system governance. This approach is grounded in the principles of transparency, accountability, and public trust. In this context, governance is defined as the exercise of influence by formal, statutory bodies in order to achieve public health goals and objectives.

The CMA advocates for a governance framework that is consistent with the following principles:

1. **Prevention**: Prioritizing strategies that prevent illness and promote health.
2. **Primary Care**: Ensuring accessible, comprehensive, and continuous primary care services.
3. **Patient-Centred Care**: Focusing on the needs and preferences of patients and families.
4. **Quality and Safety**: Promoting high-quality, safe care.
5. **Equity**: Addressing health disparities and inequities.
6. **Transparency**: Enhancing transparency through open and accountable processes.
7. **Participation**: Encouraging active participation of all stakeholders.
8. **Innovation**: Fostering innovation to improve health outcomes.
9. **Stewardship**: Ensuring responsible stewardship of health system resources.
10. **Sustainability**: Promoting the sustainability of health systems.

These principles serve as a foundation for the development and implementation of governance policies and practices in the health sector.

PHYSICIAN RESOURCE PLANNING
(Updated 2015)

The purpose of this policy statement is to outline the framework for planning the delivery of physician services in Canada. The statement provides a framework for the planning of physician services, taking into account the needs of the population and the availability of resources. It is intended to guide the development of strategies for the planning and delivery of physician services, with a focus on ensuring that the needs of all Canadians are met.

The policy statement also highlights the importance of collaboration between governments, healthcare providers, and other stakeholders in the planning process. It emphasizes the need for continued monitoring and evaluation of the planning process to ensure its effectiveness.

This policy statement is intended to support the development of strategies for the planning and delivery of physician services, to ensure that the needs of all Canadians are met.
