Dear Dr. Komppa,

The Canadian Medical Association (CMA) appreciates this opportunity to participate in the consultation on proposed front-of-package labelling of food products. Given the growing awareness of the impact of nutrition on health, CMA appreciates the opportunity to provide input on the proposed consultation issues. CMA supports the consultation led by Health Canada on the regulation of front-of-package nutrition information. CMA expresses its concern that the proposed consultation issues do not include existing food labelling requirements for specific products. 

The CMA recommends that the federal government consider the following: 

1. The CMA recommends that the federal government consider the introduction of mandatory front-of-package nutrition information for all food products.
2. The CMA recommends that the federal government consider the introduction of mandatory front-of-package nutrition information for all food products.
3. The CMA recommends that the federal government consider the introduction of mandatory front-of-package nutrition information for all food products.

The CMA urges the government to consider these recommendations as a step towards promoting healthy eating and improving public health outcomes.

Sincerely,

[Signatory]
