TOPICS  Ethics and medical professionalism

Guidelines for physicians in interactions with industry

See also companion policy Recommendations for physician innovators.

Physicians are continuously working to improve patient care and are often invited to participate in industry-sponsored activities. To protect the public interest, and to maintain the highest standards of patient care, physicians need to ensure that their participation in industry-sponsored activities does not compromise their ability to provide the highest quality care. In this document, the Canadian Medical Association (CMA) provides guidance to help physicians maintain ethical standards and professional integrity in their interactions with industry.

Physicians should ensure that their participation in activities sponsored by industry is consistent with their guidelines for patient care. They should consider the potential for financial or other benefits, and any potential conflicts of interest, when participating in such activities. They should also ensure that their participation does not interfere with their ability to provide the best possible care to their patients.

Physicians should also be aware of the potential for financial or other benefits, and any potential conflicts of interest, when participating in activities sponsored by industry. They should consider the potential for financial or other benefits, and any potential conflicts of interest, when participating in such activities. They should also ensure that their participation does not interfere with their ability to provide the best possible care to their patients.

EQUITY AND DIVERSITY IN MEDICINE

A. BACKGROUND

The purpose of this policy is to ensure that members of the medical profession are provided with a framework for understanding and addressing issues related to equity and diversity in medicine, and to ensure that medical education and practice are conducted in a manner that promotes equity and diversity. The policy is intended to guide members in their professional practice and to provide a basis for the development of policies and procedures to address issues related to equity and diversity in medicine.

1. The concept of equity in medicine is grounded in the principles of justice, fairness, and equal opportunity. Equity in medicine is achieved when all individuals have the same opportunities to access and benefit from healthcare services, regardless of their social, economic, or cultural background.

2. The policy applies to all members of the medical profession, including medical students, residents, fellows, and practicing physicians.

3. The policy is intended to support the development of a diverse and inclusive medical profession, where all individuals are treated with respect and dignity, and where differences are valued and respected.

4. The policy is intended to promote the wellbeing of all individuals, and to ensure that the medical profession is equipped to address the health needs of diverse populations.

5. The policy is intended to promote the development of a diverse and inclusive medical profession, where all individuals are treated with respect and dignity, and where differences are valued and respected.

6. The policy is intended to support the development of a diverse and inclusive medical profession, where all individuals are treated with respect and dignity, and where differences are valued and respected.

7. The policy is intended to promote the wellbeing of all individuals, and to ensure that the medical profession is equipped to address the health needs of diverse populations.

8. The policy is intended to promote the development of a diverse and inclusive medical profession, where all individuals are treated with respect and dignity, and where differences are valued and respected.

9. The policy is intended to support the development of a diverse and inclusive medical profession, where all individuals are treated with respect and dignity, and where differences are valued and respected.

10. The policy is intended to promote the wellbeing of all individuals, and to ensure that the medical profession is equipped to address the health needs of diverse populations.

11. The policy is intended to promote the development of a diverse and inclusive medical profession, where all individuals are treated with respect and dignity, and where differences are valued and respected.

12. The policy is intended to support the development of a diverse and inclusive medical profession, where all individuals are treated with respect and dignity, and where differences are valued and respected.

13. The policy is intended to promote the wellbeing of all individuals, and to ensure that the medical profession is equipped to address the health needs of diverse populations.

14. The policy is intended to promote the development of a diverse and inclusive medical profession, where all individuals are treated with respect and dignity, and where differences are valued and respected.

15. The policy is intended to support the development of a diverse and inclusive medical profession, where all individuals are treated with respect and dignity, and where differences are valued and respected.

16. The policy is intended to promote the wellbeing of all individuals, and to ensure that the medical profession is equipped to address the health needs of diverse populations.

17. The policy is intended to promote the development of a diverse and inclusive medical profession, where all individuals are treated with respect and dignity, and where differences are valued and respected.

18. The policy is intended to support the development of a diverse and inclusive medical profession, where all individuals are treated with respect and dignity, and where differences are valued and respected.

19. The policy is intended to promote the wellbeing of all individuals, and to ensure that the medical profession is equipped to address the health needs of diverse populations.

20. The policy is intended to promote the development of a diverse and inclusive medical profession, where all individuals are treated with respect and dignity, and where differences are valued and respected.

21. The policy is intended to support the development of a diverse and inclusive medical profession, where all individuals are treated with respect and dignity, and where differences are valued and respected.

22. The policy is intended to promote the wellbeing of all individuals, and to ensure that the medical profession is equipped to address the health needs of diverse populations.

23. The policy is intended to promote the development of a diverse and inclusive medical profession, where all individuals are treated with respect and dignity, and where differences are valued and respected.

24. The policy is intended to support the development of a diverse and inclusive medical profession, where all individuals are treated with respect and dignity, and where differences are valued and respected.
