GUIDING PRINCIPLES FOR PHYSICIANS RECOMMENDING MOBILE HEALTH APPLICATIONS TO PATIENTS

The present policy is designed to provide guidance to physicians about how to provide mobile health applications to patients in the context of the patient’s health, health care, and health information.

The policy provides guidance on the Canadian Medical Association (CMA) Policy Guidelines To Guide Communications With Patients.

Background

1. Mobile health applications, also known as mobile health solutions, are computerized applications that enable health care providers to transmit health information to patients. They can be used to support patient care or for health education and promotion.
2. The policy is based on principles of confidentiality, privacy, and security. It is intended to help physicians understand and manage the risks and benefits of mobile health applications.
3. The policy outlines the responsibilities of doctors and patients regarding the use of mobile health applications.
4. The policy is intended to guide physicians in the provision of mobile health applications.
5. The policy is based on principles of confidentiality, privacy, and security. It is intended to help physicians understand and manage the risks and benefits of mobile health applications.

The policy provides guidance on the Canadian Medical Association (CMA) Policy Guidelines To Guide Communications With Patients.

The policy is intended to guide physicians in the provision of mobile health applications.

The policy is based on principles of confidentiality, privacy, and security. It is intended to help physicians understand and manage the risks and benefits of mobile health applications.

The policy is intended to guide physicians in the provision of mobile health applications.
