Guiding Principles for the Optimal Use of Data Analytics by Physicians at the Point of Care

Executive Summary

Digital tools are now being used more widely in medicine than ever before. A majority of physicians in Canada have integrated data analytics into their practices. Although physicians use analytics to inform their decision-making, whether these tools provide high-quality care and improve patients’ outcomes remains uncertain. The purpose of this document is to provide guidance on the ethical use of data analytics, which provides opportunities for physicians to engage in data-driven practice improvement.

Table of Contents

1. Introduction
   1.1 Background
   1.2 Policy context
2. Guiding principles
   2.1 Trust and transparency
   2.2 Patient privacy and confidentiality
   2.3 Data quality and integrity
   2.4 Data sharing
   2.5 Data governance
3. Conclusion
