CMA POLICY

Principles for Health System Governance

The Canadian Medical Association advocates for a health system characterized by accessibility, quality, efficiency and accountability. It supports policies and programs that ensure comprehensive, integrated and responsive health services are available to all Canadians. The Association encourages a health system that recognizes the unique needs and preferences of diverse populations and that promotes health equity and accessibility. It supports the development of a health system that reflects the values and principles of the Canadian Constitution and that is based on the social, economic, cultural and environmental well-being of all Canadians.

The policy in this document has been superseded by CMA Policy 76-2019 (February 25, 2019) and CMA Policy 76-2014 (February 25, 2014). For the most up-to-date version of this policy, please visit the Canadian Medical Association's website at https://policybase.cma.ca/}
