Documents

Dear Minister [Minister’s Name],

I am writing to you with recommendations for responding to the ongoing effects of COVID-19 and to support your efforts to strengthen Canada’s health care system. These recommendations were recently released by the Canadian Medical Association (CMA) and are intended to guide the federal government in its efforts to improve long-term care and post-acute care in Canada.

In summary, the recommendations focus on enhancing the integration of primary care and acute care services, improving access to long-term care, and strengthening mental health and addictions services. They also emphasize the importance of investing in public health and preventing chronic diseases.

I would be happy to discuss these recommendations further and to work with you to ensure that Canada’s health care system is better equipped to respond to future challenges.

Sincerely,
[Your Name]
