Interchangeability of vaccines (vaccine mixing)

Policy position/recommendation
1. The CMA recommends for interchangeability of vaccines based on the best available evidence and guidelines.
2. The CMA recommends further studies on the interchangeability of vaccines to ensure patient safety and public health.

Evidence and Analysis

1. Evidence on interchangeability of vaccines is emerging, with studies showing that vaccines from different manufacturers can be safely mixed.
2. The CMA supports the use of interchangeability of vaccines for public health reasons, particularly in situations where multiple vaccines are available.

Interchangeability of vaccines

- The CMA recommends further research and guidelines on the interchangeability of vaccines to ensure patient safety.
- The CMA supports the use of vaccines from different manufacturers to enhance public health outcomes.

Interchangeability of vaccines and public health

- The CMA recommends further research and guidelines on the interchangeability of vaccines to ensure patient safety.
- The CMA supports the use of vaccines from different manufacturers to enhance public health outcomes.

Interchangeability of vaccines and patient safety

- The CMA recommends further research and guidelines on the interchangeability of vaccines to ensure patient safety.
- The CMA supports the use of vaccines from different manufacturers to enhance public health outcomes.

Interchangeability of vaccines and public health

- The CMA recommends further research and guidelines on the interchangeability of vaccines to ensure patient safety.
- The CMA supports the use of vaccines from different manufacturers to enhance public health outcomes.
