Interchangeability of vaccines (vaccine mixing)

Interchangeability of vaccines (vaccine mixing)

Policy position recommendation:
1. The CMA recommends, for now, that the vaccines received by a single patient be from the same manufacturer. This recommendation may change if new evidence becomes available.

2. The CMA recommends that health-care providers use a framework to ensure that all vaccines are traceable, which includes the manufacturer, lot number, and expiration date.

3. The CMA recommends that all patients receive a vaccination card that includes the manufacturer, lot number, and expiration date of the vaccine received.

4. The CMA recommends that all patients receive a vaccination card that includes the manufacturer, lot number, and expiration date of the vaccine received.

Interchangeability of vaccines

Interchangeability of vaccines may be considered for different reasons:

1. In some cases, such as when a patient is allergic to a component of the vaccine, it may be necessary to switch to a different vaccine.

2. In some cases, such as when a patient is allergic to a component of the vaccine, it may be necessary to switch to a different vaccine.

3. In some cases, such as when a patient is allergic to a component of the vaccine, it may be necessary to switch to a different vaccine.

4. In some cases, such as when a patient is allergic to a component of the vaccine, it may be necessary to switch to a different vaccine.
