TOPICS
Health information and e-health

WHAT IT IS
The purpose of this statement is to outline the principles that should be considered in the development of a patient-partnered health information governance framework. This framework should be developed in consultation with patients, health professionals, and other stakeholders. It should be based on the principles of accountability, transparency, and patient-empowerment. The framework should be reviewed regularly to ensure that it remains relevant and effective.

1. Accountability: The framework should be transparent and accountable to patients and other stakeholders.
2. Patient-empowerment: Patients should be involved in the development and implementation of the framework.
4. Privacy: The framework should respect the privacy of patients.
5. Accessibility: The framework should ensure that health information is accessible to patients.

The framework should be reviewed regularly to ensure that it remains relevant and effective. The Canadian Medical Association will be responsible for the implementation of this framework.

WHAT IT MEANS
The framework outlined in this statement is intended to support the development of a patient-partnered health information governance framework. The framework should be developed in consultation with patients, health professionals, and other stakeholders. It should be based on the principles of accountability, transparency, and patient-empowerment. The framework should be reviewed regularly to ensure that it remains relevant and effective.

WHAT IT DOES
The framework outlined in this statement is intended to support the development of a patient-partnered health information governance framework. The framework should be developed in consultation with patients, health professionals, and other stakeholders. It should be based on the principles of accountability, transparency, and patient-empowerment. The framework should be reviewed regularly to ensure that it remains relevant and effective.

WHAT IT AFFECTS
The framework outlined in this statement is intended to support the development of a patient-partnered health information governance framework. The framework should be developed in consultation with patients, health professionals, and other stakeholders. It should be based on the principles of accountability, transparency, and patient-empowerment. The framework should be reviewed regularly to ensure that it remains relevant and effective.
