A PRESCRIPTION FOR SUSTAINABILITY – E1967

Executive Summary
Modern medicine has recognized that the health of an individual can be best maintained by promoting a healthy lifestyle, ensuring adequate access to health care services, and implementing policies that support the health of the population. Preventive care and health promotion are essential components of this approach.

The health care system in Canada is facing challenges related to funding, access, and the delivery of care. It is crucial to ensure the sustainability of the system in the long term.

The Saskatchewan Health Authority, in consultation with partners, has developed a strategy to address these challenges. The strategy includes initiatives such as improving data collection and analysis, increasing funding for primary care, and enhancing access to mental health services.

The Saskatchewan Health Authority encourages feedback from stakeholders to ensure the success of the strategy. It is committed to implementing the strategies and recommendations of the Commission on the Future of Health Care in Saskatchewan.

The Saskatchewan Health Authority also supports the implementation of strategies that promote the health of the population and ensure the sustainability of the health care system.

The Saskatchewan Health Authority is a leader in health care reform, and its initiatives are aimed at improving the overall health and well-being of the population.
