Clinical Review

Editor's key points

- A timely and quality rural anesthesia, surgery and obstetric care program enables timely patient care and reduces the burden of specialist and non-specialist providers in the most underserved and resource-limited rural programs.
- A timely and quality rural anesthesia, surgery and obstetric care program enables timely patient care and reduces the burden of specialist and non-specialist providers in the most underserved and resource-limited rural programs.
- A timely and quality rural anesthesia, surgery and obstetric care program enables timely patient care and reduces the burden of specialist and non-specialist providers in the most underserved and resource-limited rural programs.

Consensus statement on networks for high-quality rural anesthesia, surgery, and obstetric care in Canada

Summary

Objective To describe the essential components of well-integrated and high-functioning rural high-quality networks that support high-quality anesthesia, surgery, and obstetric care in the most underserved and resource-limited rural programs.

Composition of the committee A consensus statement was developed by the Society of Obstetrician and Gynaecologists of Canada, the Society of Rural Physicians of Canada, the Royal College of Physicians and Surgeons of Canada, the Canadian Association of General Surgeons, the College of Family Physicians of Canada, and the Association of Canadian University Departments of Anesthesia.

Methods A collaborative effort over the past several years allowing the professional organizations has culminated in this consensus statement on rural care designed to integrate and support a specialized and specialized, urban and rural, anesthesia, surgery, and obstetric care in the high-functioning networks based on the best available evidence.

Report Surgical and obstetric high-quality care to be established within networks to address the barriers between rural high-quality programs and local access to care, safety and quality needs to be developed for the maintenance of care for patients and providers, regardless of network size. The role of patients' access resulting in a high-quality outcome while reducing wait times, reducing costs, clinical coaching between rural and regional centers, can be helpful in building and sustaining high-functioning networks. Maintenance of quality and the process of continuing professional development in rural settings represent a mutual care proposition.

Conclusion The building relationships that are fundamental to successful networks in high-quality rural anesthesia, surgery and obstetric care, and quality improvement. Conversely, a collaborative effort in these endeavors, allowing a potential program that is high-quality clinical networks built on the principles and supporting evidence described in this consensus statement.
