Clinical Review

Editor's key points

A timely and quality rural anesthesia, surgery and obstetric care program provides timely, quality care to patients and residents in rural areas. The development of networks of specialists and non-specialists provides for the recruitment and retention of specialists in these rural programs.

A timely and quality rural anesthesia, surgery and obstetric care program provides timely, quality care to patients and residents in rural areas. The development of networks of specialists and non-specialists provides for the recruitment and retention of specialists in these rural programs.

A timely and quality rural anesthesia, surgery and obstetric care program provides timely, quality care to patients and residents in rural areas. The development of networks of specialists and non-specialists provides for the recruitment and retention of specialists in these rural programs.

Consensus statement on networks for high-quality rural anesthesia, surgery, and obstetric care in Canada

Summary The development of networks for high-quality rural anesthesia, surgery, and obstetric care in Canada is a timely and quality program that provides timely, quality care to patients and residents in rural areas. The development of networks of specialists and non-specialists provides for the recruitment and retention of specialists in these rural programs.

Objective To describe the essential components of well-resourced and high-functioning rural anesthesia, surgery, and obstetric care networks that support high-quality anesthesia, surgery, and obstetric care in rural Canada, wherever it is feasible to have as possible.

Composition of the committee A consensus statement was developed by the Society of Obstetricians and Gynaecologists of Canada, the Society of Rural Physicians of Canada, the Royal College of Physicians and Surgeons of Canada, the Canadian Association of General Surgeons, the College of Family Physicians of Canada, and the Association of Canadian University Departments of Anesthesia.

Methods A collaborative effort over the past several years among the professional organizations has culminated in this consensus statement on networks for high-quality rural anesthesia, surgery, and obstetric care in Canada. The statement was developed through a series of consultations and meetings with stakeholders in the field of rural anesthesia, surgery, and obstetric care in Canada.

Report Surgical and obstetric care needs to be established within networks to address the barriers between rural anesthesia, surgery, and obstetric care and to ensure that patients and residents in rural areas have access to timely, quality care. The development of networks of specialists and non-specialists provides for the recruitment and retention of specialists in these rural programs. The development of networks of specialists and non-specialists provides for the recruitment and retention of specialists in these rural programs.

Conclusion The building relationships that are fundamental to successful networks for high-quality rural anesthesia, surgery, and obstetric care in Canada is a timely and quality program that provides timely, quality care to patients and residents in rural areas. The development of networks of specialists and non-specialists provides for the recruitment and retention of specialists in these rural programs.

The Rt. Hon. Justin Trudeau, P.C., M.P.
Office of the Prime Minister
39 Wellington Street
Ottawa, ON, K1A 0A6

Re: Recommendations for Canada's long-term recovery plan

Dear Prime Minister Trudeau,

We would like first to thank and commend you for your leadership throughout the pandemic. Your government's efforts have helped many people in Canada during this unprecedented time and have prevented Canada from facing outcomes similar to those seen in other countries experiencing significant pandemic-related hardship and suffering.

We are writing to you with recommendations as you develop a plan for Canada's long-term recovery and the opening speech from the House on September 17th.

The COVID-19 pandemic has further exposed and amplified many healthcare shortfalls in Canada such as care for older adults and mental healthcare. Added to that, the economic fallout is impacting employment, housing, and access to education. These social determinants of health contribute to and perpetuate inequality, which for us, the pandemic has already exacerbated for vulnerable groups. Action is needed now to address these dual legacies and improve the healthcare system to ensure Canada can chart a path toward an equitable economic recovery.

To establish a foundation for a stronger middle class, Canada must invest in a healthier and fairer society by addressing health care system gaps that were exacerbated by COVID-19. We kindly believe that the measures we are recommending below are critical and should be part of your government's long-term recovery plan:

1. Enhance pandemic emergency preparedness
2. Invest in virtual care to support vulnerable groups
3. Improve supports for Canada's aging population
4. Strengthen Canada's National Anti-Racism Strategy
5. Improve access to primary care
6. Implement a universal single-payer pharmacare program
7. Increase mental health funding for healthcare professionals

We know the months ahead will be challenging and that COVID-19 is far from over. As a nation, we have an opportunity now, with the lessons from COVID-19 still unfolding, to bring about essential transformations to our health care system and create a safer and more equitable society.

1. Enhance pandemic emergency preparedness

We commend you for your work with the provinces and territories to deliver the \$19 billion Safe Restart Agreement as it will help in the next six to eight months to increase resources to protect front-line health-care workers and improve testing and contact tracing to protect Canadians against future outbreaks. Moving forward as you develop a plan for Canada's long-term recovery, we strongly recommend the focus remains on fighting the pandemic. Beyond the six to eight months outlined in the Safe Restart Agreement, it is critical that a long-term recovery plan includes
