Dear Mr. Chabrier:

The Canadian Medical Association (CMA) is pleased to provide the submission in response to Health Canada's Consultation on "Plain and Standardized Packaging" for Tobacco Products: Potential Measures for Regulating the Appearance, Shape and Size of Tobacco Packages and of Tobacco Products, Document for Consultation, May 2016.

Canadian physicians have been working for decades toward the goal of a smoke-free Canada. The CMA issued its first public warning concerning the hazards of tobacco in 1956 and has continued to advocate for the strongest possible measures to control its use.

The CMA has been a leader in advocating for plain and standardized packaging for tobacco products for many years. We established our position in 1986 when we passed a resolution at our General Council in Vancouver recommending to the federal government "that all tobacco products be sold in plain packages of standard size with the words 'this product is injurious to your health' printed in the same size lettering on the front panel, and that no extraneous information be printed on the package."

Over the past 30 years we have reiterated our long-standing support for the concept of tobacco products being sold in standardized packages in several briefs and policy statements. The current Health Canada proposal will help realize that goal and the CMA supports the measures outlined in the consultation paper.

There are two elements that the CMA recommends be addressed in this consultation. The CMA recommends that only the "tall and slender" style of package be authorized and that the "fat top" package be removed. This would reduce the permitted styles to one standard package and allow for the largest possible surface area to be used to convey health warnings and other health-related information.

In a similar vein, the CMA recommends a single allowable length of cigarette and that a maximum diameter be established. The purpose is to eliminate the sale of "short" and "super short" cigarettes to eliminate the possibility of these products as being considered "harmless."
